

HER2 Signature Validation with ICBP drugs and with CCLE CNV data

Mumtahena Rahman

December 17, 2014

Reading datasets in... and calling assign..

Now correlating HER2 predictions with ICBP drugs..

```
drugs<-read.delim("~/Dropbox/ICBP/ICBP_drugs_1.txt", header=1, sep='\t',row.names=1)
pred_drug<-merge_drop(data,drugs,by=0)
#dim(pred_drug)
for(i in 1:length(colnames(data)))
{
  #print(colnames(data)[i])
  print("correlation with Lapatinib..an EGFR/HER2 inhibitor")
  print(cor(pred_drug[i],pred_drug$Lapatinib,use="na.or.complete"))
  # print("correlation with BEZ235..a pi3k/mtor inhibitor")
  # print(cor(pred_drug[i],pred_drug$BEZ235,use="na.or.complete"))
  # print("correlation with Everolimus..an mtor inhibitor")
  # print(cor(pred_drug[i],pred_drug$Everolimus,use="na.or.complete"))
  # print("correlation with Temsirolimus..an mtor inhibitor")
  # print(cor(pred_drug[i],pred_drug$Temsirolimus,use="na.or.complete"))
  print("correlation with Sigma AKT1/2..an AKT inhibitor")
  print(cor(pred_drug[i],pred_drug$Sigma.AKT1.2.inhibitor,use="na.or.complete"))
  # print("correlation with GSK2126458..an AKT inhibitor")
  # print(cor(pred_drug[i],pred_drug$GSK2126458,use="na.or.complete"))
  # print("correlation with TRICiribine..an AKT inhibitor")
  # print(cor(pred_drug[i],pred_drug$Triciribine,use="na.or.complete"))
  #
}
```
